## RISCHKE 181 - THE CLASSIC

U.S. Patent No.: US D595,763 S  
EUIPO Design No. 000946611-0006 / -0009

What makes the Rischke 181 different from the usual Telecaster is a slanted humbucker and the typical Rischke cutaway. This guitar is very compact, delivering a tone with extraordinary substance and punch. The cutaway's reverberant qualities add still more resonance and spice, and the split humbucker's gripping, cutting tone will be found hard to compete with.
