RISCHKE 263 - THE PREMIUM CLASS SYMBIOSIS

U.S. Patent No.: US D588,185 S
EUIPO GM No. 000919451-0003 / 000946611-0009

Modell 263 unites the top features of several models and is maybe the series' most outstanding personality. The 263 features the same compact layout as the 181 and – thanks to the incision in the cutaway and the fairly long body horn – develops an extraordinarily punchy, resonant tone. Even when played dry, i.e. not yet plugged in, you will feel the 263's resonance throughout your body.

The powerful humbucker can fully play to its qualities, and the in-between positions of the single coils are highly versatile. In split mode, the humbucker excels with a premium-class cutting tone.
